

THE ANNALS INDEX VOLUME 31

As usual, the principle of parsimony is observed while introducing new subject headwords into the comprehensive index list. Nevertheless, to reflect the spectrum of research subjects from contributions in this volume, four headwords were added, including Certification (cross-referenced to Standard), Climate change, Gastronomy (cross-referenced to Tourism, culinary), and Well-being (cross-referenced to Satisfaction, life). Sixteen subheadwords were introduced to mirror the expansion of knowledge on existing subjects. These subcategories were Behavior, involvement; Knowledge, management; Marketing, services; Methodology, ethnomethodological approach, frame analysis, and narrative; Model, adaptive cycle, constraint, core-periphery, information search, and occupation-based; Psychology, affective state; Social, democracy; and Theory, complexity, financial portfolio, and new growth. ■
